TRUSTED QUALITY

REHAU QUALITY ASSURANCE

The basis for REHAU's profile quality is our very own recipe using the quality compound RAU-PVC. This recipe is the culmination of over 50 years of research and trials. The high quality compound used to create the renowned REHAU smooth gloss finish ensures that the windows stay white and retain their pristine appearance indefinitely.

Of course, our profiles are UV-stabilised and are able to withstand severe climatic conditions. REHAU windows are durable and will keep their looks for many years whatever the weather throws at them.

REHAU QUALITY MARK SCHEME

The REHAU Quality mark for window design sets high standards of product quality and workmanship for window and door system installation. It ensures that REHAU fabricators acquire and maintain the know-how and understanding of REHAU Window Systems. Both REHAU and our network of fabricators share the same vision towards building premier homes for Asia Pacific's sophisticated homeowners.

>> **Look out for the REHAU Quality mark to ensure you have selected a qualified fabricator, the best window system and peace of mind.**

BEST PROTECTION

ENGINEERED WITH SECURITY FOR YOUR FAMILY AND PROPERTY IN MIND

Worried about burglars? REHAU increases your safety with a durable, impact tested formulation. The profiles themselves are reinforced with steel, making the windows sturdy enough to withstand the onslaught of any dacoit.

MULTI-POINT LOCKING

Due to the Eurogroove in our sash profiles, all multi-point locking hardware can be installed in windows and doors to further deter burglars.

SECURED GLAZING DESIGN

In addition, REHAU windows are internally glazed. This means the glazing beads that hold the glass in place are on the inside. Therefore, the glass cannot be removed from the outside by any would-be-intruders.

FOR ALL CLIMATES

ENERGY SAVING

Thanks to their clever design, REHAU window profiles are a very poor conductor of heat or cold. In very hot climates like the Asia Pacific region, this will reduce your reliance on cooling devices such as air conditioning. Of course, it also works the other way round. Keep out the cold and save on heating costs by choosing REHAU window profiles!

Either way, you will feel the positive impact of up to 75%* savings on your energy bill!

>> Each REHAU Window System is specially formulated to suit the global spectrum of climates and regions.

* when choosing double glazing

EASY CLEAN

DUST PROOFING

What keeps out the dust? The sealing in REHAU Window Systems is calibrated to achieve excellent air tightness. This effectively stops dust drifting in from the outside, which drastically reduces the time you'll need to spend cleaning your home.

**Save time
and money**

CHEMICAL RESISTANT

Being made of exceptionally durable uPVC, REHAU windows are extremely resistant to pollution, diluted acids and alkalis. REHAU's uPVC can be cleaned with warm water, a gentle household detergent and a soft cloth.

>> All in all, a REHAU window system is virtually guaranteed to help you save plenty of time and money over the long duration of its use.

GERMAN PRECISION

SOUND INSULATION

Once home, you want to leave the outside world with its chaos and clamour where it belongs – outside! REHAU Window Systems are perfectly designed to reduce sound transmission. The dual compression gaskets assure the tightness of the windows and doors. Combined with suitable glazing and installed in a professional way, REHAU windows can achieve a sound reduction of up to 40dB. This easily exceeds the recommended sound-proofing level for sleeping rooms even in busy town centres.

WATER TIGHTNESS

There is more! Thanks to the dual compression gaskets and an 8-10mm overlap between frame and sash, REHAU Window Systems prevent rainwater from infiltrating your home. Your home stays absolutely dry however heavily it might be raining outside.

>> **Highly effective dual compression gasket that causes tightness of our windows and doors also leads to excellent sound insulation!**

UNLIMITED DESIGN POSSIBILITIES!

When it comes to style and range of windows, REHAU has left few stones unturned. Everything from inward opening windows to outward opening windows, single windows to multi light windows with transoms, balcony doors, sliding windows and doors – the creative possibilities are virtually unlimited! At REHAU we engineer your dreams.

ATTRACTIVE COLOURS

Adding flavour and being tasteful has never been easier. With a wide range of colours and multiple configurations to choose from, our windows visually enhance both the interiors and the façade of any home. REHAU uses only foils that are specially engineered to withstand extreme UV radiation, that do not warp, flake or peel and there is no need for painting anymore. This is what we call timeless beauty.

**No more painting!
REHAU foils do not
chip, warp or rot!**

For more details on colour options, please refer to REHAU's separate colour chart.
